

Product Care Instructions

RAINWEAR

You can keep the adventure going even if the heavens open with a high-quality rain jacket, but you need to look after it to ensure it performs the way it was designed to. Mountain Designs recommends the following care instructions:

CLEANING YOUR RAINWEAR

- Before washing, ensure that all zips, flaps and tabs are closed. Also check that there is nothing in the pockets.
- Machine wash your rainwear garment with warm water at 40°C on gentle cycle, using a mild soap or detergent. Do not use bleach, fabric softener, conditioners or stain removers as they can affect the garment's performance.
- Rinse well.
- Tumble dry your rainwear on medium heat. Alternatively, dry it flat.
- Do not dry clean or iron your rainwear.

ACTIVATING DWR ON YOUR RAINWEAR

- Upon purchase, the garment's DWR may be 'flat' due to shipment and storage. A quick iron or tumble dry before first wear will ensure optimal performance.

RESTORING DWR ON YOUR RAINWEAR

- Every 12 months, you may consider restoring the DWR finish on the outer fabric of your rainwear. The best way to tell if it needs re-proofing is to spray some water on the outer fabric - if it beads up and rolls away it is ok, if it appears to soak into the fabric then it is not ok.
- Apply a DWR treatment as per the instructions of the care product supplier.

GENERAL TIPS & NOTES

- If in doubt, check the care label on the inside of your rainwear and follow the care instructions provided.
